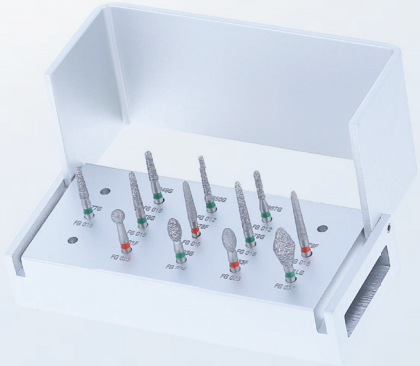
THE LORD OF THE BURS

Just like the movie we all know, they say „one ring to rule all". As I designed this Kit I would like to say „one Kit to prep all". To practice restorative Dentistry, you need nothing else but this set.



It is designed for the new generation dentists to PREP for

› All-ceramic restorations; crown, bridge, inlay, and onlay
› Veneer (e.max or empress esthetic)
› Lithiumdisilicate, Zirconia material (monolithic or layering)
› Future technology of CAD-CAM restorations

Your preparation will be compatible with future digital workflow: impressioning, scanning, and milling technology. It is also designed for the conventional preparation.

› Porcelain fused to metal restorations
› Full metal restorations

Last but not least, it is very helpful when you get to occlusal adjustment on temps or final ceramic restorations. This „The Lord of the burs" Kit is hand-picked to complete every single steps of your restorative work from A-Z.
