COMPOSITE DIAMOND POLISHERS

**Mirror finish guarantee!**

- › Diamond interspersed polisher
- › Suitable for all type of composites - including the latest generation of hybrid composites
- › Available as 1 step or 2 step course
- › Extended life time
- › Reduced polishing time

## *jota product line* COMPOSITES DIAMOND POLISHERS

### 2 Solutions for perfect results

Polishers interspersed with diamond grit are indispensable for polishing composites to a professional, high quality and with optimal results. There is an enormous range of very different polishing systems on the market and their use is becoming increasingly more expensive. Users often do not execute all the polishing steps for reasons of time, which then leads to corresponding results being not optimal. Using the composite polishing system JOTA EASY or JOTA PROFESSIONAL after correct preparation with tungsten carbide finishers allows to reduce polishing to 1 step. After contouring, an outstanding, mirror finish polish is achieved by using the JOTA high-performance diamond polisher with optimised bonder. The polishers are made from temperature-resistant materials and are therefore suitable for the autoclave.

#### **1 JOTA EASY: To achieve outstanding shine in stride!**

One-step high-performance diamond polisher for the finishing and mirror finishing of all composites.

The JOTA EASY is a polisher with interspersed diamonds developed for all composite materials including the latest generation. The one-step polishing system is outstandingly suitable for smoothing and subsequent mirror finishing. The user can control the degree of removal according to the pressure applied. With JOTA EASY one achieves superb polishing results in reduced polishing time.

#### **Suggestion:**

*JOTA EASY*

*Grain: fine*

*Skimming: 7.000 - 10.000 rpm*

*Polishing: 3.000 - 8.000 rpm*

*max. rotary speed: 20.000 rpm*

## 2 JOTA PROFESSIONAL: The solution for perfect results - because it simply needs to be perfect!

Two-step diamond polishing system for finishing, smoothing and mirror finish polishing of all composites.

The JOTA PROFESSIONAL System is used as a 1st step before using JOTA EASY high-performance diamond polishers. JOTA PROFESSIONAL is a polishing system interspersed with diamonds, developed for all composite materials including the latest generation of high-filled hybrid composites. In a 2nd step JOTA EASY is used with 3000 - 8000 rpm for the mirror finishing. JOTA PROFESSIONAL convinces because of its superb polishing results - Simply High Professional!

### *Suggestion:*

*JOTA PROFESSIONAL Base*

*Step 1 - Green: Forming & Skimming*

*Grain: medium*

*JOTA EASY*

*Step 2 - Gray: Mirror finish polish*

*Grain: fine*

*max. rotary speed: 20.000 rpm*

**Diamond Polishers are sterilisable up to 5 times. Further sterilization will modify the consistence of the polisher and may result in substandard results.**

## jota product line COMPOSITES DIAMOND POLISHERS

JOTA EASY instruments are available as kit 1393

9831.RA.030		JOTA EASY
9832.RA.060		
9833.RA.100		
9834.RA.040		

JOTA PROFESSIONAL Kit 1394 contains JOTA EASY and JOTA PROFESSIONAL instruments.

9825.RA.030		JOTA PROFESSIONAL
9826.RA.060		
9827.RA.100		
9828.RA.040
